

## EH1000

---

HENERGY Professional dynamic Earphone

---

### Description

The EH1000 professional dynamic earphone offers a clear and defined sound thanks to the 10mm drivers in Mylar. It provides an excellent acoustic insulation from background noises thanks to the in-ear design and to the soft silicon earbuds available in three sizes. Fitted with a 1.2m cable with gold-plated plus (iPhone compatible) it is available in three different colors. It can be used also as earphones for in-ear personal monitor systems in live applications.
